EDUCATION

Georgia Institute of Technology

Master of Science, Aerospace Engineering

December 2027

Bachelor of Science, Aerospace Engineering – GPA: 3.5/4.0

December 2026

- Georgia Tech Honors Program | Highest Honors | Dean's List
- Relevant Coursework: Deformable Bodies, Thermo and Fluid dynamics, Aerodynamics, System Dynamics, Controls, Vehicle Performance

WORK EXPERIENCE

High-Power Electric Propulsion Laboratory

Atlanta, GA

Undergraduate Research Assistant

Aug 2025 – Present

- Supporting **Hall thruster and ion engine testing** in HPEPL's high-vacuum facilities. Conducting assembly, vacuum conditioning, and performance characterization.
- Contributing to NASA-supported **JANUS research**, focused on translating ground-test data into predictive models and performance extrapolation for **high-power EP systems**.

GE Aerospace

West Chester, OH

Turbine Airfoils Intern

May 2025 – Aug 2025

- **Led engineering feasibility analysis** for part consolidation across **CF34 turbofan engine programs**, evaluating **airflow performance**, **seal slot geometry**, cooling hole patterns, coating durability, axial length, and hanger compatibility to determine **interchangeability** potential while maintaining **structural integrity and thermal performance**.
- Developed production sunset and capacity optimization strategy for multi-part grinder operations **increasing manufacturing efficiency by 33%**, minimizing machine downtime, and sunset low-demand parts while enabling future introduction of high-demand components.
- Executed **\$250M+ CAPEX planning** and forecasting by consolidating multi-site spending data into Smartsheet, creating visual dashboards and **training all TAVS sites** to ensure accurate **budget tracking through 2032**.
- Applied Change Execution Management (CEM) principles to drive **multi-site manufacturing changes**, creating Long Range Forecasts for **EDM, grinder, laser, and X-ray asset approvals** across 6 sites for 2026–2028.

GE Aerospace

Cincinnati, OH

Development Assembly Intern

May 2024 – Aug 2024

- Completed **2 official dispatch orders** for **CFM LEAP engines** focusing on **process improvement** utilizing **GD&T, and LEAN**.
- Worked with **assembly engineers** on the **LEAP 1A & 1B engines** for inspection and identifying **5+ critical quality errors**.
- Oversaw the **procurement, designing, and manufacturing** of housing for engine components, **implemented my design** in the development assembly **shop floor** and across multiple sites **throughout the U.S.**
- **Shadowed senior executive management** and collaborated with a **cross-functional team** to create a **value stream map** of our future process **reducing cycle redundancy** from 7 steps to 4.

Georgia Tech Ramblin' Rocket Club

Atlanta, GA

GNC Subteam Lead, Structures Recovery and High Powered Rocketry Member

Aug 2023 – May 2025

- Subteam **lead of 20+** undergrads building **actively guided gimbaled rockets** for **controlled ascent/descent**.
- **Static fired 1** time, **launched 3** times, **2 AIAA publications** and competed at the 2024 & 2025 Regional Student Conference.
- Planned/tested **single & dual-deployment recovery** systems and **self landing** capabilities.
- Manufactured and assembled **test stands for jet vanes analysis** to be employed within **Thrust Vector Controlled rockets** with self-landing capabilities. Planned/tested recovery systems. **Static fired 4** times.
- Successfully **built from scratch, launched, and safely recovered** a High Powered Rocket by **designing** and **simulating** flight dynamics ensuring stability and performance. Achieved the National Association of Rocketry L1 **High Power Certification**. **Reached 1km apogee**.

SKILLS

- **Software:** SolidWorks, Fusion 360, Ansys, ArchiCAD, AutoCAD, GrabCAD, OpenRocket, CAM, NX, Tableau, DAQ, MS Office
- **Tools:** Lathe, Mill, Planer, Hydraulic Press, Band Saws, CNC, Waterjet, Laser Cutter, Soldering Iron, Power Tools
- **Programming Languages:** Python, HTML, Matlab, Simulink
- **Soft Skills:** Sourcing, planning, time management, detailing, efficient use of resources, leadership and teamwork
